Hey Nic – just realized one small addition wasn't on the version I sent you. Can you add this to the Description of threat section. Trying to keep the Fund Center happy.

"Pilot Grove Creek is designated as a perennial creek and is a tributary to Lake Lavon, approximately 12 miles downstream."

Subject: Enterprise PolRep

Nic – Attached are my comments/suggestions/questions. PolRep looks really good. It probably looks like a lot of changes, but just moved some info to match the PolRep guidance and made a few suggestions. Since Ruhl is reviewing some of the Oil PolReps and I will be doing the others, I want us to be consistent. I would appreciate any input you have on PolReps. You write a good PolRep.

Let me know if you have any questions or concerns. I used track changes for ease of review.

Bryant
